## **MARINE SCIENCE EDUCATOR PART TIME POSITION**

### **About the Organization**

Project Oceanology's mission since 1972 has been to nurture enthusiasm for science and for our planet's marine environment from our waterfront facilities on Long Island Sound in Groton. As a year round, marine science and environmental education organization operated by a 501(c)(3) nonprofit association of boards of education, colleges and other educational institutions, Project O has pioneered a hands-on, inquiry oriented approach to science through programs meeting state education standards. Using our research vessels, skiffs, oceanographic equipment, and marine laboratories, Project O leads more than 25,000 students and adults annually as they learn about the ocean, estuaries, rivers and marine life through firsthand, on-the-water science-rich experiences in the surrounding waters of Long Island Sound, Fishers Island Sound and the Thames River.

### **Marine Science Educator**

Project Oceanology seeks an innovative, experienced and dedicated educator to deliver inspiring marine science and environmental education programs for elementary through high school students, college students, summer camp participants, and the general public. The Marine Science Educator will contribute to the expansion of programs, the revision and integration of Project Oceanology's activities into local school curricula, and delivery of summer camps. Successful candidates will be passionate, energetic, and versatile team members.

The Marine Science Educator will report to the Director of Curriculum and Instruction. Applicants should have knowledge of marine science and broad interest in oceans, including coastal ecosystems, fisheries resources, human interactions and management issues. Delivery of marine science programs aboard research vessels, on shoreline programs, in marine laboratories, and in classrooms will constitute the majority of the job assignment. Considerable physical stamina is required to work aboard vessels and outdoors for long periods, including during inclement weather. Project Oceanology seeks a team player with knowledge of science pedagogy, sound judgment, independence, initiative, maturity, and excellent observation and communication skills.

This full time position will commence Oct 1. Up to 32 hours of work will be scheduled weekly, including some evenings and weekends. Although not a required certification, applicants with a valid USCG OUPV license will receive first consideration.

**Education, Experience and Training:**

- BA/BS degree in biology, marine science, environmental science, or related field desired.
- Formal or informal education experience required.
- Next Generation Science Standards knowledge highly desired.
- Outdoor, environmental education and/or marine science education program experience highly desired.
- Proficiency with Gmail/Google suite, MS Word, MS Excel required.

**Certificates/Licenses:**

- First Aid/CPR and medical administration certifications are required; candidate must have or be able to obtain those certifications during training offered by Project Oceanology
- USCG OUPV license is highly desired.

**Application:**

To apply please send a cover letter and resume to [admin@oceanology.org](mailto:admin@oceanology.org). Applicants selected for an interview will be required to submit the Project Oceanology employment application (located at <http://www.oceanology.org/employment>) and submit to background checks and drug testing as required by law.

Project Oceanology is an Equal Opportunity Employer, committed to attracting and retaining a talented and diverse workforce. All qualified applicants receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, ancestry, pregnancy, marital status, genetic information, disability, or age.
