

PROJECT OCEANOLOGY

Creature Feature: Snail

STEAM Connection

The young scientist in the story, “Did You Make the Hole in the Shell in the Sea,” asked questions to find the answer to the mystery of the hole in the shell. Along the way, she learned about different *adaptations* or strategies animals have to overcome the protection of a hard shell!

How does the seastar eat the clam?

How does the seagull eat the clam?

How does the lobster eat the clam?

How does the moon snail eat the clam?

Think about strategies humans use to eat the food below. Draw a line from each human food to the animal from the story that uses a similar strategy for eating.
