

**Welcome to Project Oceanology!** As a year-round non-profit marine science education organization, our mission comes to life each summer when the school year ends and our Marine Science Educators step into their roles as Camp Directors and staff. We are a CT licensed youth camp offering both day and overnight programs for campers ages 9–17, and since 1972, families have trusted us to provide meaningful, memorable summer experiences. Many campers return year after year—starting in day camp and later moving into residential programs—and we’re proud to welcome your family into this tradition.

At Project Oceanology, we believe in fostering a deep, lasting connection with the ocean and its ecosystems. Campers learn by doing: cruising Long Island Sound on our research vessel and fleet of skiffs, exploring salt marshes, and conducting hands-on experiments in our marine labs. Along the way, they discover the creatures that call the Sound home and why protecting these environments matters.

Guided by professional marine scientists, campers build real skills in oceanography, biology, and environmental science. They measure water quality, collect marine organisms, and use oceanographic tools—all while participating in fun, team-building activities that encourage collaboration, curiosity, and problem-solving.

Our goal is to inspire responsibility and stewardship for the marine environment, empowering campers to become thoughtful advocates for the ocean’s future. We’re excited to share this journey with your family and look forward to an unforgettable summer of learning, adventure, and fun!
