

PROJECT OCEANOLOGY

Creature Feature: Lobster STEAM Connection

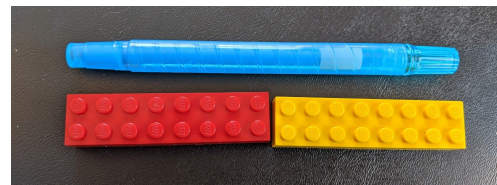

Remember when Big Joe used a gauge to measure how big the lobsters in the trap were in the book Going Lobstering? Look around your house to find an item that you can use as a standard unit to make some measurements of your own. Measure at least three different items! Don't forget to share your results to **#ProjectOCreatureFeature**

Here's an example:

I chose to use a lego as my standard unit of measure.

Things I measured...	Length
1. Book	4 legos
2. Crayon	2 legos
3. Table	13 ½ legos

YOUR TURN:

Things I measured...	Length
1.	
2.	
3.
