

PROJECT OCEANOLOGY

Amazing Squid: True or False

	<u>TRUE</u>	<u>FALSE</u>
1. The squid has a shell because it is a mollusk (like clams and snails).	<u>T</u>	<u> </u>
2. The squid can change its color using pigment cells in its skin.	<u>T</u>	<u> </u>
3. Squid ink is highly toxic to predators, and can kill anything that comes too close.	<u> </u>	<u>F</u>
4. Squid do not see very well, so they rely on their sense of touch to find their prey.	<u> </u>	<u>F</u>
5. Squid have 8 arms AND 2 tentacles to capture and eat their prey.	<u>T</u>	<u> </u>
6. The squid pen is very strong and provides protection from predators.	<u> </u>	<u>F</u>
7. The squid's food has to pass through its brain on the way to the stomach.	<u>T</u>	<u> </u>
8. Squid are excellent swimmers; sometimes jetting quickly and sometimes steering easily among obstacles.	<u>T</u>	<u> </u>
9. Squid have four hearts to pump their blood throughout their body.	<u> </u>	<u>f</u>
10. A squid mouth is called a beak.	<u>T</u>	<u> </u>
