

PROJECT *OCEANOLOGY*

Barrier Beach Follow-Up Questions

Activity Questions:

- In your own words, describe the importance of creating beach profiles.
- Why is it important to run transects perpendicular to the shoreline?
- In your own words, describe the elevation change at your site.
- How do the beach profiles you created compare to your observation of the beach?
- Do you think beach profiles change with seasons? Explain
- What factors can affect beach profiles? Explain
- Were any beach features you missed when you conducted your beach profile? If so, why?
